Re: Letter of Intent – Dominion Imaging, LLC – Addition of One Computed Tomography Scanner and One Magnetic Resonance Imaging Scanner

Dear Dr. M. Norman Oliver,

I am writing pursuant to 12 VAC 5-220-180 of the Virginia Administrative Code to advise you of the intent of Dominion Imaging, LLC to file certificates of public need application for a Computed Tomography (CT) scanner and an Magnetic Resonance Imaging (MRI) scanner in the City of Richmond as Dominion Imaging seeks to enhance its diagnostic imaging center to provide the community with improved access to clinically important high-end medical imaging technology that will raise the value of patient care. The imaging center is located in the western portion of Richmond City.

I ask that you please send the appropriate application forms so that we may proceed in the upcoming review cycle for Batch Group D.

Sincerely,
Edwin W. Swager,
Managing Member
